

Rectangular Waste Containers

PCI Mfg Solutions' Rectangular Waste Containers are designed to withstand the harshest treatment and environments. Designed for industrial and construction waste that requires relocating large quantities of material, these open-top containers will hold even the bulkiest waste.

PCI Mfg. Solutions can customize any container to suit your needs. The company's central location in north Texas allows for customer pickup and ensures that shipping charges won't demolish the budget. And with the help of PCI's state-of-the art, 150,000 sq. foot manufacturing facility, every product leaves the plant ready for work, complete with safety and customer-specific decals.

Standard Rectangular Rolloff Specifications:

Walls: ASTM A36 10-gauge plate 8 formed vertical wall stiffeners and angled bottom

Floor: ASTM A36 7-gauge bottom plate with C3 x 4.1# cross supports at 15" spacing
