

## Tub-Style Waste Containers

PCI Mfg. Solutions' Tub-Style Waste Containers are designed to withstand rough treatment and environments. Designed for industrial and construction waste that requires relocating large quantities of material, these open-top containers will hold even the bulkiest waste. This rolloff's tapered sides allow customers to easily stack them for shipping or to save space.

PCI can customize any container to suit your unique challenges. The company's central location in north Texas allows for easy customer pickup and ensures that shipping charges across the country won't demolish the budget. With PCI's state-of-the art, 150,000 sq. foot manufacturing facility, every product leaves the plant ready for work, complete with safety and customer-specific decals.

### Standard Tub-Style Rolloff Container Specifications

**Walls:** ASTM A36 10-gauge plate with angled bottom

**Floor:** ASTM A36 7-gauge bottom plate with C3 x 4.1# cross supports at 24" spacing

**Bulkhead:** ASTM A36 10-gauge plate with "doghouse" style front

**Rear Door:** ASTM A36 10-gauge plate with formed channel stiffeners and two steel hinges with grease fittings for the 20- and 30-yard containers; the 40-yard has three steel hinges with grease fittings

**Rear Door Securement:** Side-operated latch with 3/8" safety chain

**Lifting System:** 1" A36 recessed tow hook

**Undercarriage:** 6" x 2" x 1/4" tubing for main rails, 4" x 6" steel with greaseable axle for nose rollers, and 8" x 10" steel with greaseable axle for 2 rear ground rollers

**Internal Coating:** None

**External Paint:** One color direct-to-metal paint, customer color choice
